Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft landing gear damaged, left wing damaged, prop damaged
No other property damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Normal preflight inspections, runups, takeoff, and downwind, base, approach and final.

Landing was center line at stall speed, two wheel touch down followed immediately by tail wheel touch down.

Light cross wind from the right lifted the right wing slightly and pushed the aircraft to the left side of the runway. I over corrected and the aircraft turned sharply to the right and slid off the right side of the runway into the dirt where the left main landing gear caught in the dirt and broke, quickly followed by the aircraft toppling over to hit the left wing on the ground. Turned off main power and exited aircraft. Called to report the accident to NTSB, FAA, Airport, and plane owner.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation
