**Description of Damage to Aircraft and Other Property** *(Use additional sheet if necessary)*

The Fire wall was bent. Landing Gear Bold was broken. Main structure of the plane had some bends in it.

**NARRATIVE HISTORY OF FLIGHT** *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was instructing a new student on there first night flight. we were working on take offs and landings at the ogden airport. We were on final approach for runway 35. The approach was stable and we decended to the runway. We leveled off about 10-15 feet above the runway starting our flare to land. As the aircraft started to slow my student let go of the back pressure on the yoke allowing the nose wheel to drop and hit into the ground before our main landing gear. We bounced once and i grabed the controlles and settled the plane back onto the runway. We taxied off the runway and I didnt notice anything wrong with the plane. We taxied back and did 2 more take-offs and landing before finishing the flight for the night. We did a post flight on the plane and visually i didnt see any damage. The airplane went into have a 100hr inspection the next day and that is where the damage was found.

**RECOMMENDATION (How could this accident/incident have been prevented?)**

## Operator/Owner Safety Recommendation

This Accident could of been provented if I was faster at getting onto the controls after the student released the backpressure just before the nose hit into the ground.
