Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> By flipping over in a forward motion, the nose wheel broke off, the propeller hit the ground, the empennage got damaged.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. Accident Report of N4642J Inverness 11/12/2018 Flight lesson with Theodora Uniken Venema to work on traffic pattern. We flew from Crystal River KCGC (Awos: 1832z 130/3 10sm 4. sc 30/21 A3002) to Inverness KINF to work on Traffic Pattern. The INF Awos was out of service, so we overflew the Airport at 1500 ft to check the windsock. (170°/ 6-9 kts) We entered left downwind for Runway 19. Turning Base we added 10° flaps and on final we added full flaps. We had 65 kts on final. We came in ground effect on the runway and I instructed Theodora to hold the yoke and let the plane settle on to the runway. Suddenly the aircraft veered to the left, off the runway and I said: „I have the controls“. I added full Power, reduced flaps to 15° and tried to get the plane in ground effect under control. The airplane veered in a approximately 45° angle to the left and I couldn't override the rudder controls to get the plane back onto the runway. On the slightly rising terrain, the airplane hit a ditch, the nose wheel broke off and it flipped on its back. I turned the master and ignition off and turned the fuel tank selector to off. Nobody got hurt.
