Statement by Dan Smith regarding prop strike with 8222N October 19, 2018 at 1 PM

I was taxiing the club plane after landing on 27 to takeoff again when I hit the mobile ladder used to fuel high wing plane with the right wing of the plane. It left a dent about a foot from the tip of the wing. I proceeded to go a little farther and I hit something else that caused the plane to pivot to the right and ending with a prop strike and a bent prop.

I was planning on working on maneuvers because I anticipated doing my check ride with an FAA Examiner on October 29 and I wanted to get extra practice in.

The reason I was so close to the fuel farm was because a contractor was filling in all the cracks in the pavement with a hot black tar like substance. The area that the contractor was working in was the space directly in front of the fuel farm all the way across to the grassy area where the wind sock is located. The contractor had his truck and trailer with the hot tar parked in the area where pilots park when they come to eat at the airport restaurant. The contractor used cones to mark off the area where he wanted to avoid traffic. The cones came into the area that we park the plane to refuel. I thought I would have enough space to get through and spent more time trying to avoid the cones than how close I was to fuel farm.

I was not physically hurt but I can't say that for the plane. I called John Strope. He was just arriving at Connellsville airport where he was about to do an annual. He said try and get the plane into the hanger. I was able to free the plane from the gate used to secure the fuel farm and pulled the plane all the way across the area until I got to the place where there is a slight incline. It went very slow after that. I found that if I let loose of the tow bar, the plane would roll back wards. I struggled at this for longer than I want to remember. Finally, a Good Samaritan pulled up and asked if he could give me a hand.

He said he was from Washington County and he knew this plane. He was a pilot that had lost his physical many years earlier. He said he comes to the airport and sits in the new parking lot and watches planes come and go. He even has a radio that he listens to what the pilots have to say. He sat and rested after we had the plane secured in the hanger.

I can't tell you how devastating this was for me. I notified Jeff Halliday. Jeff suggested that I contact FSDO in Allegheny County. I told him I would.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

1. I could have back taxied on 27. The contractors were not working on the run way.
2. I could have parked the plane and waited for the contractors to complete their work.
3. The county could have hired contractors who had experience working on airports. They would have created taxi ways that would accommodate aircraft.
