Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Engine running prop strike into building. Massive cowling damage. Engine mount broke. Wind screen broke. Instrument panel destroyed. Both doors broken. Overhead skylight broken. Damage to both Wings. Fuselage bent in several places. Fuel tank leak. Landing gear bent. Muffler destroyed. Tail rudder bent. Fire wall bent beyond repair. Hanger main entry destroyed. Left door destroyed. Other framework bent or dislodge from anchors. Whole hangar moved two and half feet.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in Ink)</i> Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. Departure from KAJ0 Corona on December 8, 2018 at around 9AM. Arrived at L26 Hesperia at around 10AM. Was on approach to land runway 21 my airspeed was around 65 miles per hour. Planned to land close to numbers. When approximately 15 feet above ground I felt a drop not like a stall, more like a down draft. I then added some power and tried to get my nose down. When nose came down I hit on my nose wheel. Then the mains hit causing an uncontrollable bounce. This turned int a porpoising effect. I added full throttle which may have caused plane to veer left off the paved runway. I tried to turn right but did not have enough speed for my rudder to be effective and my nose wheel was still bouncing off ground. This made it difficult to turn right. I went off left side of runway into dirt muddy area. At this point I throttled back and tried to brake. After crossing 75 feet of muddy dirt, I then crossed about 50 feet of asphalt a slammed into empty hangar. Turned off all power and fuel. Then exited airplane.		

RECOMMENDATION (If more space is needed, continue on separate sheet)															
Operator/Owner Safety Recommendation Looking back this accident could have been avoided by having more speed and altitude for my approach. I should have landed further down runway.
