

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: IMMOKALEE State: FL

ZIP: 34142 Country: USA

Latitude: 26.4331667 Longitude: -81.4010278

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 11/05/2018 Local Time: 5:45 PM

mm/dd/yyyy

Time Zone: -5

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N9225G

Manufacturer: MAULE

Model: MX 7-180A

Serial Number: AC20001C

Year of Manufacture: 1993

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 2400 lbs

Weight at Time of Accident/Incident: 1963 lbs

Number of Seats: 4 Flight Crew Seats: 1

Cabin Crew Seats: 0 Passenger Seats: 3

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
- ☐ Aerobatic
- ☐ Balloon
- ☐ Commuter
- ☐ Transport
- ☐ Utility

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The Maule received damage to the aircraft when the tubing of the of the left rear of the control surface contacted the taxi sign and damaged it also. I was told that the estimate of repair to the Maule was \$4,000. Maule sent the parts to repair the Maule. Unfortunately the parts did not fit and Maule had to send replacement parts.

Finally it was decided to send the Maule to the Maule factory and have it returned to new by the factory at considerable cost.

I was told that the damage to the taxi sign would cost \$2,500 to replace it.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

November 16, 2018

Inspector Roberto Rodriguez

South Florida FSDO

Dear Inspector Rodriguez,

On November 5, 2018, I received a flight review from Mr. Ted Brousseau in a Maule aircraft, N9225G. My previous flight review expired on October 31, 2018. After the ground work was completed, we departed from our home base at KAPF and did some air work. We then flew to KIMM where I did three touch and go landings. On climb out following the third landing, Mr. Brousseau advised that we were finished and could go back to Naples. Mr. Brousseau decided that he would fly the aircraft, so I made a positive control transfer to him, which he acknowledged. He remained in the pattern for a landing. Upon touchdown, the aircraft veered off the runway to the right and went into the grass. When Mr. Brousseau got the aircraft going straight, he added full power, accelerated and lifted off. Immediately after the aircraft became airborne, the left horizontal stabilizer contacted a runway sign. As the aircraft was already in the air and climbing, Mr. Brosseau continued around the traffic pattern and made an uneventful landing.

Thank you,

Robert L. House

The flight began around 3:00 PM taking off from KAPF with the purpose of administering a Flight Review for Bob House. He did standard air maneuvers with Bob House at the controls. When we arrived at KIMM I requested Bob to enter the pattern for runway 09. The wind was slightly variable from the right. Bob demonstrated various take off and landings, i.e., short field, soft field and cross wind. All take offs and landings were executed on the hard surface.

As Bob was entering the down wind for the final landing I took over the controls to demonstrate how I do a full stall landing. After touchdown the plane quickly went off the hard surface into the grass to the right. I thought it was too late to safely bring the aircraft to stop for fear of ending up on our back.

Due to the fact that the Maule has short field take off and landing ability I started a go-around. The aircraft quickly lifted off the grass and seemed to be successfully clearing the taxi light ahead. It seemed to be in slow motion. We cleared the propeller, then the landing gear. Then we felt something like a soft thud at the rear of the aircraft.

We were still flying, .climbing and noted that the end of runway 9 was quickly approaching. I decided that the grass had not been friendly earlier and I was unwilling to trust it on an unknown mushy surface so I continued to climb into the pattern.

Rather than possibly end up on our back on the soft surface I chose to land on the hard surface. I made a successful landing and no injuries. I then taxied to the FBO and normal shutdown.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Any time you are flying a tail dragger you must focus staying straight until you are down to walking speed.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

MR. Hicks, here is the finished product. I hope everything is filled in properly. The one area I struggled with was the idea of "Flight Crewmember" That looks like something for airliners. Please let me know if I need to include that info too.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
