Kathryn,

Please see below report.

Date of accident 11-28-18
Place: Pickens County Airport
Aircraft: Cirrus SR20 (343BZ)

I Dhaval Doshi was taking flight lessons with my instructor Sherri Taylor that morning. We departed from KPDK and took direct flight to KJZP. We planned to do pattern work that day. We did two or three patterns before the incident. During th last unsuccessful landing, we were about 5 to 10 feet off from the runway centerline and Sherri asked for a go around and as we were trying to climb it got into a stall and she asked for controls and the plane started to lean towards left and couldn't not rotate and after that it started hitting cars and other ground objects. When it came to a complete stop, I heard people screaming from outside for me to quickly remove seat belt, open door and jump, jump, jump sounds and after I was able to get the the left wing, someone assisted me to get down to the floor. After that I heard someone requesting someone else to bring golf cart as I couldn't stand, they put me on golf cart and took me fifty feet away to get away from fire hazard. Then I waited on the ambulance and was taken to Kennestone hospital in Cobb County.

Please reach out to me if you have any questions.
