NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed owner owned and supplied ground support equipment (dolly) for a local flight over an adjacent field for some basic maneuvers. Returned back to ground support equipment (dolly) and landed. All normal. Aircraft was stable and sitting on dolly. Aircraft engine reduced engine to 70% and applied control frictions for preparation for complete shutdown after proper cooling. With approximately 60 seconds prior to complete shutdown the ground support equipment (dolly) failed and the aircraft rolled aft and to the right off the ground support equipment. Aircraft came to rest on its right side. There were no prior issues with weather, aircraft, or pilot operation. The owner supplied ground support equipment (dolly) suffered a failure of it's 3 section hinged system.
