Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Both Rotor blades on helicopter have a puncture about one foot back from the end. No buckling or other damage observed by the mechanic.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Got up and saw it was a beautiful day. trying to build time so decided to go out and fly. Went out and preflighted then took off around 9:30am. Flew north on my property. As i was about to leave my property i observed coyote tracks and wanted to inspect. Turned around and flew over power line crossing my property. Saw the power line and crossed it over the pole which is what i am trained to do. Flew for a bit then turned around and flew back over the power line again looking for coyote. Turned and flew over it one more time. As i crossed the power line the coyote took off to the left. I turned left to follow it for about 200 yards. It disappeared behind some rocks. When i turned to the left to swing around and find the coyote i took my attention off the power line and hit it. It was a quarter inch line so it broke easily. The helicopter lifted slightly then went right back to flying. Once i hit it i knew right away what it was. I immediately verified three in the green and RPM's were okay then began to land immediately. I experienced no vibration or unusual behavior. When i got out of the helicopter i identified the small hole in end of rotor. We moved the helicopter to the hangar and called the individual i lease from. He sent a mechanic up to check out the rotor. The mechanic worked with the Robinson factory and determined that the incident only required rotor replacement.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should never have taken my eye off of the power line. In the future i will maintain full visual awareness regardless of the activity i am engaged in.
