Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Sheared off vertical section of tail and rudder.
Utility guy-wire clipped.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

In route to KPTN for runway 24.
Encountered flock of large circling birds approx. 3 miles out on base leg before turning final.
Aborted turning base leg to final and made rapid descent to avoid birds.
Birds followed downward and pilot made evasive maneuvers to further avoid birds.
In looking for space to pull plane back up, power-lines spanning bayou were seen, and further evasive manner (dive down) to avoid.
Tail of aircraft clipped lowest guy-wire which sheered off the vertical tail piece with rudder.
Pilot was able to maintain control without tail section and turned back north and climbed.
Pilot contacted New Orleans Approach and declared mayday and requested flight following.
New Orleans approach suggested turning back to KPTN, but this was not an option due to strong crosswind.
Pilot suggested KBTR, but then changed request to KREG due to direction of runway straight into wind, and to avoid flying over heavily populated areas.
New Orleans Approach followed until radar contact was lost near KREG.
Pilot maintained constant speed of 160 mph (indicated) to keep the aircraft in control.
Pilot lined aircraft up correctly with runway 35 at KREG and crossed threshold approx. 10 feet AGL still holding 160 mph.
Pilot extended landing gear, tried to deploy flaps but cancelled due to plane starting to nose over.
Pilot reduced power for landing, aircraft yawed right, power was increased again to maintain control and direction, but left turning tendency of aircraft yawed plane to left.
Pilot touched down on runway approx 125+ mph and almost immediately ran off runway to left into adjacent field of tall grass and mud which stopped the aircraft.
Pilot shut off engine and other systems, and both passengers safely evacuated aircraft through open canopy.
