NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My name is Javier Franco student Pilot at ANSON Aviation with Certificate Number [REDACTED] On the day of December 27th around 12:30PM CST I was doing pattern work and on my fifth landing which was a full stop and go, I set the aircraft with call sign N17SJ for a soft field take off, I set up 10° of flaps, trim take off, over all instruments in good standards, then I applied full power, as soon as I did that the aircraft start drifting a little bit to the left which I corrected with right Rudder as usual, but the drift to the left intensified. What I did next was to abort the take off by pulling the power to idle, but the aircraft continued out of control to the left I applied the brakes, opposite rudder but the aircraft went off the runway.

Right off the runway it hit a runway sign (#3) with the left strut and made full stop about 200 feet after the strut hit the sign.

When the aircraft came to a full stop, immediately I shut off the fuel valve and pull the mixture out, I communicate with tower letting them know that I was uninjured, turn the master off and exited the aircraft and waited for the authorities to come to the site.

There could be a factor on that day which it was a possible wake turbulence, the drift was so heavy that the aircraft went uncontrollable, the reviews from the Flight school says that the aircraft was in good conditions, so that lead me to an uncontrollable P-factor from the drift based on a possible wake turbulence at the runway.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

According with the flight school the nose wheel was in good conditions as well as the brakes on the left gear, also rudder in good conditions.
