Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left horizontal stabilizer hit steel fence post damaging leading edge and cut on underside. Right elevator came down on steel fence post creating hole.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This was a solo proficiency flight. I try to fly twice a month during the off season. I run through basic maneuvers and do a few landings at one of the private strips around Yakima. This day I made two landings at Shangri-la and was on base for the third when the engine lost power. Instead of setting up immediately for an off field landing, I hesitated, switched the fuel to both and expected the engine to restart. When it did not, I set up for a landing. Now, I was about 200' AGL and had limited options. I landed fine fine but could not stop before I hit a fence. I checked the fuel later and had ample fuel in both tanks and fuel flow from each. After talking with other pilots I determined the only possible reason to lose power was carburetor ice. Also the first 170s to come out have a fuel pump. Because of the routing of the fuel lines it is possible (though very remote) to develop an air lock. I have never turned on the fuel pump and in five and one half years have never needed it. Talking with the previous owner, it happened to him once. So that was a possibility.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

On take offs and landings I will turn on the fuel pump. On landing I will always turn on carb heat in the downwind, turning it off on final so I have full power if I need to go around.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
