Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller was damaged , elevator had little damage and the wire fence that was hit had some damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After five takeoff and landing, I wanted to go do solo flying in the pattern by myself. So for the better view from the windshield, I tried to adjust my seat while taxing to the runway . My seat slipped back while adjusting and I was not able to reach rudder peddle or the brake and because of that, I could not stop the plane which was going to the left and also my seat belt was getting on my way to lean forward to reach for the rudder peddle or the brake.. I did panic by that time. I knew I was losing the control. I did pull the throttle to idle and within three second the plane was in the ditch hitting the wire fence and damaging the plane.

RECOMMENDATION (How could this accident/incident have been prevented?)															
Operator/Owner Safety Recommendation Yes, this accident could have been prevented. I should have made a complete stop, turn off the engine, adjusted my seat and started taxing again. OR, I could have asked my CFI to take the control of the plane and I should have adjusted my seat as needed before taxing to the runway for solo flying.															
MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)															
Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No <i>(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)</i>			Total Time/Cycles On Part _____ Hours _____ Cycles Time Since This Part Inspected/Overhauled _____ Hours
