NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On January 27th, 2019, I was operating N8170C on straight skis 25nm East of McGrath while checking my trapline. On about the 9th off airport landing of the day at about 1500 hours, I landed on a previously unknown surface and ended up side loading the gear from the left side against a large "tussock" hidden by snow. The left landing gear folded under the aircraft, causing the left wingtip to contact another hidden tussock. The throttle was at idle at the time of the gear collapse, causing the propeller to stop the engine when contacting the snow and tundra. Pilot and sole occupant was myself, Brett Gibbens. The 406 ELT did not activate, as the actual impact was very low. I was not injured.
