NARRATIVE OF HISTORY OF FLIGHT

I, Jesse Marshall (pilot) and Tony Dimare departed from the Canyonlands ((KCYN) Airport in Moab, UT on Feb 8 at about 8:30 am with the intended destination of Buckeye (KBXK), AZ for the Copperstate Fly-In. Upon departure forecast was very good for the entire distance. Winds aloft under 9000 ft were predicted to be around 25 mph out of the southwest. The temperature at departure was 20°. I planned stops at every 1.5 hours with an estimated arrival time of 5:00 pm that same day.

The first leg of the flight was uneventful and a smooth ride. We landed 1.5 hours into the trip at U96 Cal Black to refuel. After take-off we experienced our first bumpy weather. About forty-five minutes into this leg my passenger started to feel really ill. This quickly escalated until he was vomiting. I tried to reach the sick bags but it was impossible with my seat belt on. I saw a mile long dirt road perhaps two miles straight ahead and made the decision to put the plane on the ground to alleviate the situation.

Just before touchdown, while in the flare phase there was a sudden gust from the west. My flight path was almost due south. The gust pushed the right wing up causing the aircraft to shift suddenly to the left. This put the left wing tip into a tree causing the aircraft to rotate counterclockwise, accelerating the right wing forward, creating lift and driving the left wing into the ground at about 90° from the direction of travel. The left wheel subsequently broke off. The right wheel hit the ground and the plane went sideways for perhaps 40-50 feet. The right wing came down hard as we stopped and broke in half. We inspected the plane and you could see the damage from where the landing gear was pressed up into the aircraft causing the tubular frame to buckle from the impact. The whole incident took only 1-2 seconds and neither I nor the passenger were injured.

RECOMMENDATION (How could incident have been prevented)

Before takeoff a discussion of air sickness susceptibility with my passenger and accessible airsickness bags might have eliminated my decision to land.

I should have prioritized the situation at hand by realizing an ill passenger doesn't necessitate a hasty landing. Dirt road landings are routine living in the Canyonlands area but I should have been more patient, taken the time for a proper fly over and assured the dirt road was clear from all obstacles. I should have been more focused on Aviating and Navigating rather than the comfort of my passenger.
