Friday, February 15, 2019

On 2/12/19 I did a solo cross-country flight.

My course was F49, KSWW, KBPG, KGNC, F98, F49.

After finishing my leg from F98 to F49 I landed. After touching down on runway 18 I was in the process of slowing down and my left main gear went off the runway. I was not able to return the aircraft to the runway. The aircraft continued turning to the left (East) and crossed the taxiway. After crossing the taxiway, the aircraft's right main gear hit a mound and collapsed, the right wing and the right stabilator impacted the ground causing damage to both.

The engine was still running and there had not been a prop strike. I shut down the engine and exited the aircraft.

After assessing the damage, myself and several others, with the assistance of a forklift, moved the aircraft to my hanger (G) at F49.

Charlie Chapman Jr.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- 1 - Fly the aircraft to the hanger. Once I touched down I think I relaxed and started a chain reaction of small mistakes.
- 2 - Hold aileron into the wind. I think I turned the yolk and allowed the aileron to straighten out or maybe turn to the left, away from the wind.
- 3 - Better control of the rudder and brakes. I think I lost some control of the rudder after touch down.
