NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed KELD flying VFR at about 1530 CST. I cruised at 4500 feet. I monitored Ft Worth Center (128.2, 123.925, 132.2), Memphis Center (126.1), Razorback Approach (120.9), Tulsa Approach (134.7) and 121.5 during my flight. During the cruise portion of the flight, left rudder was needed to keep the aircraft coordinated. I had to alternate use of my left and right leg due to leg muscle fatigue. When I got close to the Tulsa airspace at near KMKO (Muskogee Davis Airport), I contacted Tulsa Approach. I told to expect Rwy 19L and was eventually told to enter a mid field left downwind for Rwy 19L. I was then instructed to switch to tower frequency of 120.3.

Tower cleared me to land at KRVS Rwy 19L. The aircraft was in the landing configuration with flaps at 100%, landing and nav lights on, mixture full rich and electric fuel boost pump on. The landing configuration was stabilized and felt normal. I was over the runway and started the flare. I was holding the plane off the ground to bleed off speed and was expecting the stall horn to sound shortly. Very little rudder was needed to maintain the centerline. When I was in the flare and still in the air about 1 or 2 feet off the ground, the plane suddenly yawed to the left about 30-45 degrees. There was not enough right rudder to restore the aircraft's direction parallel to the runway, so I decided to go around.

I advanced the throttle, whereupon the aircraft yawed more violently to the left. Very shortly afterward a portion of the aircraft impacted the ground and I was stopped on the east side of the taxiway upright. I immediately exited the aircraft out of concern for a possible fire.

After about 5 mins, I returned to the aircraft and turned off all the switches, removed the key and pulled the mixture level all the way back.

I was the only occupant and there were no injuries.
