Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The left wing is damaged and partially detached, left and front landing gear is collapsed, prop blades are bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I went out to practice crosswind landings. My pattern was too tight on the first approach and I was too high on final, so I did a go around at approximately 400 ft AGL. On the second approach I landed but failed to maintain directional control during the ground role and let the wind blow me off the runway. Before I could stop I hit a hardened snowbank.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This could have been prevented by maintaining directional control after landing

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)
