NOTAMS (D and FDC), AIRMETS, SIGMETs, PIREPs in effect at the time of the accident/incident:

DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Prop strike, engine damage, nose wheel sheared, fire wall damage.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Instructional Flight

I assisted student with preflighting the aircraft and everything checked good.

In the aircraft, prior to engine start, the student asked about the seatback not being completely straight up (seatback had been previously green squawked for mx, signed off for flight).

I then asked the student prior to starting the engine, if he was able to see over the glare shield of the aircraft and see the center line of the taxiway before we continued. The student replied yes and that it wasn't an issue since he could see the taxi line just fine.

It was a normal taxi to runway 31.

We completed a normal Run-up of aircraft.

We were cleared for takeoff on RWY 31.

I stated, "cleared for takeoff, your controls."

The student took the controls and applied full power. As he was doing so I looked over and called "engine gauges in the green, airspeed alive."

The student took his hand off the throttle and put both hands on the yoke.

As I was telling him to always keep one hand on the throttle, while on the takeoff roll, the student started a left turn off the centerline. I aided him with the rudders and he corrected for it to the right. I had my feet on rudders during takeoff as I always do with students. At this point the student then seemed to lose control of the aircraft to the left abruptly. I immediately reached for the throttle, pulled it to idle and worked the brakes. As I tried to regain control of the aircraft and bring it to a stop, I simply didn't have enough time or distance before the aircraft went off the side of the runway and into the grass.

Due to the wet conditions of the grass, the nose wheel collapsed and there was damage to the propeller and the cowling of the aircraft.

I immediately shut off all fuel sources and instructed the student to exit the aircraft.

We both exited the aircraft and waited for assistance.

Airport ops arrived shortly followed by the fire truck, EMT services, and the local police department.

There were no injuries to either myself or the student.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
