NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My intentions were to fly to my farm airstrip and do some snow landings there and then go tour the country. Since the area has had extreme snow this winter we've had excellent snow cover/depth and have been flying with skis for 3 weeks prior to accident. I took off from PUW runway 6, then turned south over my farmground (I farm a lot of ground around the airport). I lowered my skis as I intended to do some snow landings. I saw a nice, smooth ridgetop so I slowed and put flaps down. It appeared to be suitable for landing, so I touched down. Unfortunately, I was at just the right height that the tire missed a small drift, but the back of the right ski hit the 6" tall drift that was firm enough to cause the ski to pitch forward. The front of the ski then dug into the crusty snow and contacted the ground. This caused the plane to flip.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Land with tail low attitude as possible so limiting cable would keep tip higher. This is the only thing I can think of after replaying the incident in my head many times.
