First Student Cross Country SOLO

PPL 2.30

Route of Flight: KDVT-E63-E25-KDVT

Flight Plan Filed: Opened over South Proving Ground

Upon arrival at E25, monitored CTAF and received a traffic advisory

Monitored AWOS at E25 over Pumping Station

Reported winds 260 deg at 5 kts

Crosswind maybe "1 or 2" kts

Knew that cross wind would be from right on final

On short final, was not on centerline of runway, to left of centerline crossing threshold, executed a go-around

On second approach encountered a "little turbulence" on downwind

Corrected for cross wind drift on downwind

No other aircraft in pattern

Abeam aimpoint reduced power to 1600, set flaps 10 degrees, airspeed 80 KIAS

At 45 degrees to aimpoint, set flaps to 25, reduced speed to 70 KIAS; turned base reduced pitch to increase descent rate and speed

Prior to turning final, cleared final sets flaps to 40 degrees, and turned final

After rolling out on final was a little low on the glidepath, added power and increased pitch to re-capture PAPI glidepath

Airspeed 68 KIAS

After capturing glidepath, reduced pitch and power, remained on glidepath, airspeed increase to above 70 KIAS, reduced power to decelerate; decelerated to 67 KIAS; stabilized approach at 67 KIAS, on glidepath

After crossing threshold, began roundout; began reducing power, initiated flare; power to idle

In the flare encountered "bumpy" air and aircraft started a little balloon;

Added power ("maybe 200"), airspeed increased to 57 KIAS at level flight on centerline, decided to continue landing

Was a "little high" so reduced power, "level off"; began to flare again;

Just prior to touchdown, right wing raised and aircraft drifted to left of centerline

Added full power to go around; stall warning activated; leveled wings, reduced pitch a little; don't remember it rudder was used.

Stall warning stayed on; stopped reducing pitch; aircraft continued to drift left; wings in left bank

Full power at time of contact with ground.

Just prior to contact with ground pulled back pressure; trying to climb

Closed eyes at first contact with ground

Opened eyes after aircraft stopped.

Evacuated aircraft; observed no fire, re-entered and completed shutdown
