Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft destroyed some damage to cotton crop where aircraft contacted the ground

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was flying Bell 47 N96671 on the morning of April 17, 2019 a little after 11am spraying a field North of Donna that I believe is actually in Edinburg's postal zip code. The field that I was flying I started on the north side making my spray runs west to east and east to west, as the wind was out of the south and that made it to where my turns where into the wind. I had sprayed approximately 3/4th of the field when the accident occurred. I was flying west to east when the wind suddenly shifted and a gust of wind from the west hit me while spraying my altitude was approximately 3 feet agl, the gust was severe enough that I immediately lost ETL and the helicopter settled to the ground with a high ground speed. I tried adding throttle and pulling more collective pitch in order to get the helicopter airborne but she had ran out of up. Two mitigating factors were that I had loaded with chemical and fuel just prior to starting this field so I was almost at gross weight, another factor is that this particular helicopter had a muffler installed which I believe adversely affected engine performance.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not having a muffler would have help, a muffler robs approximately 10% of the available power.
