Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

1 runway light damaged
Aircraft nose gear collapsed causing prop strike
Significant damage to fuselage, wings and landing gear

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We landed at Wall airport the morning of 4/14/19 there was some snow drift on the East half of the runway. We landed on the West half of the runway and went into wall to have breakfast.

The city of Wall had not cleaned the runway or taxiway for at least 2 days.

Upon takeoff the snow was melting and running onto the West side of the runway. I planned to take off on the west side of the runway that I had landed.

Just prior to rotation, my nose gear was off the runway. I felt some water or slush pull on my left rear landing gear, pulling the nose of the aircraft about 15° to the left.

We then hit snow drifts on the East side of the runway which resulted in the plane leaving the runway, taking out a landing light and coming to a stop in the grass
