Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Wing Tip Damage, Buckling of 2 wing skin panels, Propeller Tip Damage, Possible Engine Damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The student pilot departed KCHD and had successfully landed at KPRC after completing the first leg of a solo cross country flight. After being directed by ground control to the transient parking area in front of Legend Aviation he attempted to taxi perpendicularly to the available parking spots along the edge of the ramp in order to make a tight turn directly into a T parking spot. While moving along the pavement edge the right wing struck a fence post approximately 10-15 feet off the edge of the ramp. This contact turned the plane to the right where the propeller struck a concrete parking curb at the pavement's edge.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The student should have taxied through the center of the parking area and manually pushed the airplane back into the parking spot instead of attempting to taxi directly into the spot and unnecessarily put the plane very close to the fence and other obstructions.
