Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

- wing tip rubbed on ground
- wind spar cracked in lower left wing
- damage to left wing aileron

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was landing at Gila Bend at approx 10:00 AM on April 26/2019. It was a beautiful day with ZERO wind. We passed over the airport and joined left downwind for runway 22. Landing was normal and we were slowing down. I unintentionally let the aircraft drift to the right and the right main drop off of the pavement into sand which pulled the aircraft to the right into the shallow sand ditch. The left wing tip touched the other slope of the ditch as we turned from heading 220° to stop at approx heading of 090°. I quickly shutdown the engine and there was no damage to the prop or engine.

Gordon L. Lowe.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- pilot could pay more attention to the landing
- pilot should do more dual with instructor.
