Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller, both wings, right wing strut, and vertical stabilizer

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

During the landing rollout of what seemed to be a normal landing on runway 23, the aircraft was traveling slightly left of the runway centerline. While attempting to maneuver the aircraft to the runway centerline, I lost control and the aircraft traveled across the centerline and off the right side of the runway. Once leaving the runway, it encountered very wet soil and the nose wheel buried in the mud causing the aircraft to flip over. There is a drop off from the surface of the runway to the adjacent soil of about 6-8". This drop off aggravated the incident.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Maintain positive control during the landing phase of the flight. It was a poor decision to attempt to move the aircraft from the left side of the runway over to the centerline. It would have been a better decision to continue the roll out down the left side of the runway.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
