Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

LH wing came in contact with the runway bending upward approximately 3-4 feet inboard. Propeller struck the runway destroying engine gear box and propeller.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flight was in an Siai Marchetti 1019 that originated at 7S1 (Twin Bridges, MT) and was to land at BZN (Belgrade, MT). Student pilot (Bernard Baum) was sitting front seat and I (Ryan Flaming) was instructing from the rear. Approximately 20 nm from KBZN we received the weather. The winds were stated as calm. We contacted BZN Tower & received clearance to land on 12. We had previously decided on doing a wheel landing due to a tail wheel shimmy that sometimes occurred while landing on pavement. Touch down on the main gear went smooth and everything was looking good. Power was then reduced to Ground Idle and the tail wheel was lowered to the ground (I do not recall if it shimmied on touchdown). I estimate that around 30kts ground speed, the aircraft started to turn slight right and student corrected with slightly too much left rudder which was promptly countered with too much right rudder & possible brake, which lead to the ground loop. I applied heavy left rudder & brake to counter and declared a go-around as soon as the airplane started to veer to the right. I attempted to add power but was unable to advance the power lever. I believe the power lever was being firmly held aft by the student, thus, not allowing me to add power. The aircraft's left wing came in contact with the runway and then tipped up on it's nose. After exiting the aircraft a estimated 5-7 knot tailwind was noted.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

If power could have been restored it is possible that a successful go-around may have been performed.
