Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike and broken spinner, possible crank damage. Front cowling damage. Air filter and cover and air box damage. Wind screen broken. Window on door broken. Several cabin tubes bent. Dash bent. Right wing leading edge tip bent. Left wing is tweaked and leading edge bent. Front left wing support bent. Both fuel tanks smashed at fuel cap. Top of the rudder is smashed.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Saturday May 25, 2019 I had a training flight with instructor pilot to renew solo endorsement and preparation for Private Pilot check ride. The week prior I had spent several days in ground school and had taken a mock oral exam in preparation for my check ride.

We took off around 9:30 am and flew southeast of Cody to work on required flight maneuvers. At about 10:45 we were back in the pattern in Cody and planning on doing several stop and go landings. My second landing was low on final and I added power to extend. After crossing the threshold for runway 22 I cut the power. I then flared slightly high and leveled out to keep from sinking too fast. Slight bounce on touchdown and I corrected for a slight crosswind from the south. I over-corrected for initial crosswind correction and then the plane rolled forward causing a prop strike and eventually a complete flip. I'm not sure if I held the stick forward from leveling out after my flare or if I hit the brake when I was rudder correcting on my roll out. In hindsight I was over controlling the plane and very heavy on the controls in general.

The emergency responders at KCOD brought out a fire truck and unnecessarily foamed the plane and runway where some fuel had leaked from the plane. A crew from the local FBO came out to help flip the plane back over and tow it to one of their hangars.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Relax on the controls and don't over fly the plane.
