Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The aircraft came to a stop inverted damaging the vertical stabilizer, wings and wing struts.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On the morning of June 2, 2019, a flight of four departed Astronaut Rominger Airport (KRCV) in Del Norte Colorado for a trip to the Quarter Circle Circle airstrip, 45 miles south of Gunnison Colorado. The airstrip orientation is 5/23 and 2080 feet in length by 30 feet in width. There is no airport designator but the location is N38-8.561 W106-44.7574.

I was the last to land and the approach was stabilized and uneventful. I touched down with a main wheel landing and rolled out along the runway. As I slowed down I saw several rocks with one large rock to the right and noted I was drifting to the right. I applied rudder and subsequently brakes which caused the plane to nose over and stop inverted. I was not injured. I secured the aircraft, turning off ignition, master, lights, and fuel and exited the airplane. The impact activated the ELT and we were able to secure the ELT positioned under the pilot seat and switch it to off. There was no cell phone service in the area. We loaded the the equipment from the plane into the other planes and departed. When airborne, we were able to contact Air Force Rescue Coordination Center thru an overflying aircraft and notify them there were no injuries. After landing at KRCV, I spoke via phone with the Air Force Rescue Center and then with weekend personell from the FAA and the NTSB.

I notified my insurance carrier and arranged for retrieval of the aircraft, which has been accomplished and transportation to CubCrafters for repairs.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Follow routine landing procedures including maintaining directional stability on roll out and avoid excessive use of braking.
