Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right wing tip struck ground, denting the wing tip. Plane went up on nose causing damage to the prop. Engine will need inspection.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On June 6, 2019 I departed MRI at approximately 1400, and conducted a VFR flight to GKN. Fifteen miles from GKN, I obtained GKN ASOS weather information reported winds at 12 gusting to ~18 from the east. I flew over the airport, midfield at 2600' MSL to check the windsock. I entered a left downwind pattern for runway 15. Understanding that it was a gusting crosswind from the east, I conducted a crosswind landing. Immediately before touchdown, a large gust blew, lifting my left wing causing my right wing to hit the ground. My right wheel touched down, and my tail weathervained to the right, and I rolled up onto my nose. I shut off the fuel, mixture, and mags and quickly exited the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have chosen to land at a different airport, or waited for the winds to decrease before landing at GKN.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
