Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

totally destroyed aircraft. Knocked down 1/2 acre of headed wheat on edge of field.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I took off from my private airstrip 4 miles north of Leoti, Ks. adjacent to the west side of Highway 25 at approximately 8:00. I flew to the field 5 south & one mile west of Monument, Ks. Legal description is West end of the N 1/2 of 7-11-34 Logan Co. The wind was out of the south west away from a wheat field on the west edge of my corn field. I had 900 acres of corn to spray in that vicinity.

I began my first pass from north to south straddling the demarcation line between the neighbors wheat and the corn field I was spraying. I had my right boom shut off, spraying only with the left boom. As I started my run at 130 mph and approximately 10' above the wheat crop, I noticed a tractor & corn planter setting next to the wheat about 1/2 mile further south. I was distracted by this machinery in my path, and I inadvertently lost more altitude than I realized from where I had begun. There was also a 3-4' deep erosion channel running west to east across my flight path that had a higher ledge on the far side of the channel and I misjudged my height of above the crop, striking my right main gear wheel and causing the aircraft to drop the right boom into the wheat which immediately spun the aircraft to the right and I pulled the stick all the way back but was unable to correct it. The wheat was thick and very wet! The aircraft ground looped" to the right and engine & prop dug hole in the wheat field. The distance from wheel strike to a complete stop was about a 100 yards south of the initial impact and maybe 20 yards into the wheat field. I got out of the aircraft as quickly as possible shutting off electrical switches as I left. My helmet came off in the confusion but my seat & shoulder harnesses stayed intact. I walked out thru the wheat over to the corn field and took a picture of the the wreck. A neighbor planting corn nearby saw me go down and came over to offer me a ride back to my base.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

You see and hear a lot of advice about the value of seat belts and distracted driving from cell phone use. We never really evaluate how a distraction of a second or two can effect the outcome of your day! Seat belts to some are a constant pain to use, but it can be the difference between life and death or spending the rest of your life and an invalid.

Looking into the distance that day and pondering a course of action for avoiding that tractor & planter in my path couldn't have taken more than a second or two, but it was enough to distract me from maintaining a safe altitude for that pass. I had gone 40 years w/o a serious accident! Any distractions while flying or driving can be disastrous!
