Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Tail Wheel assembly bent to the right Elevator bent on both ends, Rudder bent at bottom . Tubing for rear airframe bent near tail wheel .
Left wing cloth has small buckle . One landing light broken

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I left KSEE at 10:15 in the Morning. We asked for VFR flight Following to KRIR. Flight was uneventful with some slight turbulence in the Riverside area. We were released from ATC and got the ATIS from KRAL (closest reporting airport) . Winds were listed as calm. We were cleared for a frequency change by KRAL into Flabob (self announce).

I lined up for the grass on Runway 24 . As I came in on final we were hit by a downdraft causing us to drop around 50 feet. I corrected with throttle and was lining up for the centerline of the grass. I was then hit with a strong crosswind that blew me to the left side of the grass .

I was still lined up straight so I started to descend in a 3 point attitude. Just as I started the roll out I noticed that there were small grass mounds sticking up a bit higher than the mowed grass. As I got close to the first grass mound it became clear that those grass mounds were runway lights. I felt the aircraft hit one that sent us into a ground loop to the right.

The aircraft spun around and came to rest on the right side of the grass.

When I tried to give it throttle to exit to the taxi the aircraft would only go right . At that point I knew I had tail wheel damage.
We exited the aircraft and pushed it off the grass
