NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

June 6, 2019, @ or about 1200 Hrs, Bethel Alaska, N4085L, Bell UH-1H Huey helicopter, Lycoming T53-13 Engine. Engine failure, 150 nautical mile flight. I was informed that the aircraft was topped off with fuel prior to departure. Fuel instrument indicated As such, I did not however verify this by looking into the fuel-cell. During flight I had 5 full stop Landings with engine shut down. 3.1 miles prior to final destination Engine quit and I performed autorotation to Tundra, no injuries, no damage to private property, some damage to Aircraft, Total duration of flight just under two hours, flight ops normal, no early indications of trouble prior to engine failure. 20 minute fuel warning light came on only after landing, fuel instrument showed 225 pounds fuel on board at the time of engine failure, My Flight planning told me the Aircraft should've had about 25-30 minutes of Fuel still remaining on board at the time of incident. My assumption is that the aircraft was not fully topped off prior to departure. Nothing follows.
