Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Airplane: propeller, engine gear case, landing gear and spray system were bent. Right horizontal stabilizer and elevator were separated from aircraft, hopper and right wing were fractured. Fuselage tubing was bent in multiple places.

Other property: Derelict windmill tower was partially destroyed and about 450 feet of barbwire fence was laid down.

**NARRATIVE HISTORY OF FLIGHT** *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Monday morning flight departed MEJ airport to spray a pasture East of Liberal, Kansas. AWOS reported winds 140-6kt, at approximately 11:30am, condition necessary to avoid sensitive crops. Upon arrival, pasture was circled to observe obstacles. On the 3rd pass from the east side of pasture following SATLOC A-B line North, aircraft struck an abandoned galvanized windmill tower. Tower was partially hidden by shadow from cloud and general downhill slope of pasture. My attention was on a shed and electrical lines. Impact occurred about 3-4 feet right of fuselage on the right wing. Chemical sprayed on windshield and side windows and obscured vision. I felt aircraft pitch up some, tried to correct slightly before ground impact. Aircraft struck and felt like it slid, then reversed direction. Aircraft stopped with my leg slightly pinned by control stick. I shut master switch and fuel off, removed seat and shoulder harness and helmet and exited on to the left wing. Fuel did not appear to be leaking. Attempt to dial 911 with cell phone was unsuccessful, but I was able to call the office who alerted Seward County sheriff's office. Post-accident viewing revealed part of the right elevator was just North of tower, most of the rest of the right horizontal stabilizer and elevator were detached at wreck site.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

My ultimate mistake in this situation was not to instantly respond to "that feeling" of something's not right. Get up, Get out, then figure out what's wrong. Even a slight delay, "a heartbeat", is too long.
