Quicksilver Sport 2S was destroyed (totalled for insurance purposes)

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed Danbury, CT airport (KDXR) at approximately 9:00AM in route to Orange County, NY airport (KMGJ), flight time approximately 40-50 minutes.

Filled 12 gallon fuel tank with 4.5 gallons.

Departed KMGJ at approximately 10:20AM in route to Wilkes-Barre/Scranton airport (KAVP) which was VFR flight conditions according to ForeFlight.

Flew at approximately 2,500'-3,000' for approximately 1 hour, 25 minutes when engine started sputtering. Checked fuel level which indicated "Land Now" level. Made Emergency landing in field off Ledgesdale Road, Ledgesdale, PA, approximately 14 miles from KAVP.

Walked to a neighbors house who agreed to drive to get 4 gallons of fuel at local gas station. Pushed plane to service road of field, refueled, and make attempt to take off in first third of service road. At approximately one third of total takeoff road there was a slight rut in road. As we started take-off roll, while trying to avoid the rut, ran off road into weeds. Pulled plane out of weeds and started second take-off roll on other side of rut - which provided twice the runway as in first attempt.

Take-off experience at Both KDXR and KMGJ led me to believe that there waqs more than enough runway to lift off. Performed short field take-off and just as plane was lifting (I believe I was 1-2 feet off the ground), encountered tall grass which hung up main landing wheels and abruptly stopped and flipped aircraft.

This ended proposed flight to Missoula, Montana.

Weather information utilized was: ATIS; AWOS; and ForeFlight.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Don't rely on manufacturer's guide line for fuel consumption (5 gallons per hour @ 75% power) which should have given me a minimum of 2+ hours of flight time.

Based upon trip from KDXR to KMGJ which was 40 miles, and, used 4.5 gallons of fuel, it never occurred to me to monitor fuel consumption for the 80 mile trip to KAVP.

In future, know Density Altitude before any flight.
