Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The insurance company totaled the plane. The front wheel was broken off. The pilot side wing was damaged. The co-pilot side strut was bent. When the front wheel broke off the nose of the plane hit the ground, bending the propeller. The propeller tip dug into the ground and the plane flipped onto hits top damaging the tail.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I Charles Simms recall the events of Saturday 6/15/19 as follows

- I had planned to Fly to Lebanon Springfield Airport 6I2 with my son Kevin Simms to participate in their fly in.
 - I had originally scheduled 65641 but it had been taken off the schedule for maintenance purposes. 75903 was available so I scheduled that plane. I checked the weather and planned my flight.
 - I arrived at the Lexington Flight Club located on the West side of Bluegrass field and did my preflight check. I performed a run up and everything looked good.
 - I contacted Lexington ground and requested flight following to Georgetown 27k.
 - I flew to 27k landed without incident and picked up Kevin.
 - We departed 27k, I contacted Lexington approach and requested flight following to 6I2.
 - About 15 miles out, Lexington approach approved frequency change and I squawked VFR.
 - I checked AWOS and determined that the winds were 190 at 12
 - I entered a left downwind for runway 11, entered first set of flaps
 - I entered a left base for runway 11, entered second set of flaps
 - I entered final for runway 11 in a stabilized approach
 - I was using the side slip method and was applying right aileron and left rudder
 - I touched down right main first, then the second main
 - Big gust of wind hit before the front wheel made contact and we were off the runway
 - I saw nothing but mowed grass and thought we would slow to taxi speed
 - We hit a ditch
 - The nose wheel broke off and the propeller tip hit the ground
 - I estimate that we slid 10 to 15 yards and the plane flipped
 - Once we came to a stop, I undid my seat belt, turned off the key and the master switch
 - I then opened my door and made sure that Kevin and I exited the plane
 - Once out I took a knee and gathered myself.
 - Folks from the fly in were already surrounding the plane and they took Kevin and I inside the FBO
 - I went to the restroom to clean up and get some towels for the bleeding
 - I then called Mike Proctor, the president of our club and asked him how I should proceed
 - EMS wanted to speak with me while I was talking to Mike so I handed the phone to Kevin and then spoke with EMS
 - They wanted to transport me to the hospital but I refused. I told them I would transport myself.
 - Mike suggested that I get my personal belongings out of the plane, so Kevin and I went back out and I got the headsets and my IPAD out of the plane.
 - We then borrowed the courtesy car and Kevin drove me to the emergency room at Spring View Hospital in Lebanon
 - We were at the hospital about 3 hours. They observed me and put 3 stitches in the left side of my chin under my lower lip. My canine tooth had gone all the way through my cheek on impact.
 - Kevin had a sprained finger and they gave him an ice pack. His voice has since become hoarse and his throat is sore when he swallows. I pray he isn't hurt seriously.
 - We returned to the airport. I attempted to get the log book out of the plane but they had taped the doors shut and put a canopy over her to keep the avionics dry
 - My wife had driven to Lebanon and met us at the hospital. She drove us home.
 - We drove Kevin back to 27k so that he could pick up his car. He drove himself home
 - Rebecca and I returned to our home in Lexington.
- If you need anything please let me know.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Better decision making. I as PIC was in charge of making a go- or no-go decision. I had checked the weather and recorded wind speed and direction but failed to note the gust speed. An angle of 80 degrees with a wind speed of 10 equals a crosswind component of 10. Which I'm good with. However, an angle of 80 degrees with a wind speed of 19 (gust speed) equals a crosswind component of 20 which exceeds my competence as a pilot.
