Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Bent left rear spar. Fabric torn on wing.
Bent elevator (left).

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and in wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

VFR flight to local practice area to introduce mark to PA-12 for future tailwheel instruction for his tailwheel endorsement. Airwork S-SE of Airport. Moderate chop star as temps increased. Airwork & entry into pattern uneventful. Approach & touchdown normal. At touchdown experienced tailwheel shimmy. As tail wheel loaded with full elevator, attempted to lift & then back to help with shimmy to no effect. Felt steering to right (north) starting and applied corrective control input to no effect. Was unable to apply left brake fast enough to catch impending ground loop. Left wing touched runway. After aircraft came to complete stop. Verified mark was O.K. Restarted engine and taxied to Aerodrome. Difficult to taxi. Found after shut down left steering spring missing from Tail. Springs were present & operating normally during Pre-flight and taxi prior to take-off.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Land with diagonal favoring crosswind utilizing
wheels runway to set crosswind. maintain
better directional control on roll-out. Be
prepared to apply brake faster if required.
sooner
