2019 Mishap

Early morning July 2nd Gob and I flew Big Foot from Johnson Creek Idaho, where we were camped to Stanley Idaho for breakfast! We followed Russ and Carolyn over, as they were much faster in his Barron!

After a very nice breakfast at the Bakery Restaurant, while sitting in the sun on the deck, we walked up the hill to the airport. Russ departed first. Then it was my turn. I did my checks and run-up, then moved onto the rather narrow paved portion of the runway.

The Airport

The airport is located on top of a steep bluff above town. The runway is rather long for the Back Country of Idaho at 4,300 ft. and runs downhill at a fair gradient. This is good, since the elevation is 6,403 ft. From the paved run-up pad, there is a 1,000 ft. or so of pavement, then the rest is fairly smooth dirt/gravel. The airport information lists the runway width at 150 ft. However, the paved portion is only maybe 40 to 50 ft.

I moved onto the paved portion of the runway, did my normal last minute items, and asked if Gob was ready to go? When she said yes, I added power and started to roll briskly down the runway. The take off roll seemed completely normal.

At about 45 to 50 Kts (tail not up yet), with tail wheel locked, there was a sudden strong lurch to the right. My first thought was a blown right main gear tire! I immediately overcorrected to the left. Then as I pulled the power off, I overcorrected back to the right, then once again back to the left! Each of these swerves, was larger and stronger than the previous one. By this time I was hard on the brakes!

This last swerve put my left main tire approximately one foot off of the pavement. The dirt there was smooth and fairly hard. The heavy braking dragged that tire in the dirt leaving about 10-15 ft small trench (3-5 inches deep) in the dirt. Then apparently the tire hit something very solid and stopped! However, the aircraft didn't stop! It went up on it's nose, then very very slowly went all the way over onto it's back.

This left us hanging upside down in our seats. Fortunately, I have (had) a very good seatbelt/shoulder harness system and this prevented any injuries to either of us!

First of all we tried opening the doors. Very confusing. Which way do you push the handle, when you are upside down?!?! The doors both opened, So we released the belts and immediately fell on our heads.....then we scrambled over the underside of the wings and away from the aircraft. In seconds I determined that there was no fire, so climbed back in and shut off the master and turned the mags off. I also checked the tires and wheels. They all had good air pressure and spun easily.....No blown tire! And no locked brake.

Both the sheriff and an ambulance were on the scene within 15 minutes. The ambulance people checked us over, found nothing wrong with Gob. but found a tinv scratch on mv right wrist and a bit larger one on mv left shin. (These are the kind of iniuries that I get every time I

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

My corrections to the swerving would not have been over corrections if the pavement were wider! I would have gotten it stopped upright on the pavement!
