Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose gear collapsed, prop strike, sheet metal belly where nose gear collapsed, engine mount broken.
No other property was damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Time was approximately 2:15 eastern time on July 9, 2019. Location was runway 36 at Columbia airport 4G8, Columbia Station, Ohio. Weather was good, temperature about 80 F, visibility unlimited, north wind about 5 knots. Purpose of flight was to do simulated FR approaches at nearby airport, KLPR.

Normal takeoff was initiated. The airplane did not gain altitude normally and was only a few feet off the runway at the half way point. Right wing dropped a little and may have caught in 4 foot high grass and the edge of the 40 foot wide runway. Pilot cut power as aircraft turned about 10 degrees right and landed in high grass and mud. Aircraft came to rest nose down about 100 feet east of runway 36 and north of the turnout on the runway.

Nothing departed from the aircraft and it is intact with collapsed nose gear, bent prop and other dents and scratches.
