NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I preflighted aircraft N403FR at 09:30 AM on 7/19/2019 for a private pilot check ride with Steve Green (DPE). We taxied to the north run up area at KAPA where we performed a run up, and everything to this point was good. Contacted ground control and we were cleared to taxi to runway 17L via taxi way Alpha. After a short while, we were cleared on to runway 17L to line up and wait. I was then asked to perform a simulated soft field take off. We were then cleared for take off on 17L, and fly straight out i believe. I placed the flaps in the 10 degree position, applied back pressure on the yoke and began to add power all the way to a full power setting. I went threw my take off check list as the aircraft accelerated down the runway, airspeed was coming up, and both engine gauges were in the green and everything seemed normal. I was anticipating the aircraft to become airborne, at which point, i would have decreased the back pressure to let the nose come down so we could pick up airspeed and climb out. Unfortunately, i never felt it come up. I applied a little more back pressure, at which point the aircraft popped up, banked to the left severely and impacted the runway and went off in to the grass on the east side of runway 17L. We performed the emergency shut down procedure and exited the aircraft immediately
