Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The airplane had substantial damage including a prop strike, wing damage and bent landing gear.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We departed Oceanside Airport (KOKB) at 1810Z in VFR meteorological conditions. The route of flight was direct to Phoenix Deer Valley Airport (KDVT). Our cruise altitude was 7500 feet MSL. We arrived in the Phoenix area about 2000Z. Descent was normal. While we were on the downwind to runway 25R the tower told us there was a crosswind. Because of that notification I made sure I had a long (1 mile) final so I had plenty of time to set up if need be. By the time we were on final it appeared the winds were light and variable. Shortly after a normal landing the aircraft veered to the left off the runway. I did everything possible to stop the turn to the left but was unable to correct the action of the airplane. After evacuating the airplane we noticed there was no wind. Both the pilot and passenger suffered no injuries. The airplane had substantial damage including a prop strike, wing damage and bent landing gear.
