Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

AIRCRAFT TOTALLED

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I Rented a plane at Sunshine Flyers in Auburn. I have flown a few times before. I did a preflight except fuel and went in the office and asked about it. They had given me a Key and told me to check the fuel gauge myself. I turned on ignition and master and gauges. I saw a gauge what I thought was fuel go to 3/4 green. I went in and asked how far 3/4 tank would go and they said about 3-4 hundred miles. The plane had been already rented that morning, so I figured that they

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Read gauges and don't rush pre flight

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

had used 1/4 tank. I took off from (AUN)
To (E16) to visit with friends.
Left Auburn at 11:44 and flew to ~~San Martin~~ ^(E16)
about 103 NMiles landed around 1 PM nice
flight and uneventful. Visited friends
and took off from (E16) to return to
(AUN) around 5 PM did not do a big pre
flight, only checking control surfaces and
looked like plenty of fuel left. I didn't
realize again that I had been mistakenly
looking at the Volt meter, not the fuel
gauge next to it, which I couldn't see any

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE

movement. Anyway I'm flying from (E16) to (AUN) and the engine sputters then stops. No luck restarting so I looked at my iPad and thought I could do a straight in to Tracy (TCY) I had never judged any engine out from outside the pattern so I didn't make it. When the runway (30) was in view I saw ~~2~~ 2 white landing lights then 1 white & 1 red. By the time it was 2 reds I looked for alternate landing sight but it was too late my wing clipped a tree and spun the plane around absorbing most of the impact. Luckily some fishermen near the levee came and helped pull the stuck canopy open and they pulled me out. I was banged up & my head cracked the canopy but I was no scratch on my body. The Garmin pilot says I landed at 5:50 PM.
