Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Propeller detached, engine detached, right wing and left wing damage, cockpit window broken		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.		
I arrived at the field for Larry Romine and noticed a pulling unit was on the east side of target field. I notified the office and went to the down wind side and started spraying. As I got closer to the unit I saw a pickup drive up and then leave. The oilfield crew went inside the doghouse so I assumed it was the land owner in the pickup that I saw earlier. I figured he had told them to get inside so I could spray around the pulling unit side. I flew around the pulling unit two times to look for obstacles and to make sure everyone was inside. I didn't see anything that was a hazard to myself or the crew so I continued spraying. I made a turn and had just started my last pass on the south side of the unit. I heard a loud noise and the airplane's right wing was trying to drop, I countered the drop but could not stop it. Finally the right wing tip hit the ground and the airplane cart wheeled and came to rest upside down. I unbuckled my seatbelt and exited the airplane. I walked back to the pulling unit to make sure everyone was okay and to see what I had hit. The pulling unit crew had a line ran nearly 200 ft out into the field and it was not flagged. It was a small, rusted line and there was no way I could have seen it. It, the line, should have not been there, there is not supposed to be anything out of the boundaries of the location per lease regulation.		

RECOMMENDATION (How could this accident/incident have been prevented?)			
Operator/Owner Safety Recommendation This incident could have been avoided if the oilfield company would have been in compliance with lease regulations and not have had on of their lines running out into the field off of their location.			
MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)			
Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No <i>(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)</i>			Total Time/Cycles On Part _____ Hours _____ Cycles Time Since This Part Inspected/Overhauled _____ Hours
