MEMORANDUM FOR 8020-23 BLOCK 33 NARRATIVE ATTACHMENT

FROM: HERMAN STENSHOLT, Student Pilot

SUBJECT: Student Pilot Statement

On wednesday 07/10/2019 I went out for a flight with my instructor, to practice single engine operations and simulated engine failures. We started the flight by practicing maneuvers and single engine operations in the practice area, after this we flew to Palatka to practice landings. In our last round in the traffic pattern i started to feel fatigued and a bit of motion sickness. I informed my instructor of this in our base to final turn of the traffic pattern. I believe this contributed to a shift in focus for both my instructor and I, and as a result of this we failed to complete the entire landing checklist, which resulted in a landing without the landing gear extended. There were no injuries.

WHERE DREAMS TAKE FLIGHT
