Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose gear fail. Subsequent prop strike.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

"Rusty Pilot". Aforementioned 13 hours flight time first in 13 years.

This was my third touch and go. Flew pretty good pattern with good airspeed control. Confident. Previous landing was really good. On this landing I arrested a slight sink rate on short final with a touch of power. Checked: 83 knots @ numbers. Landed and aircraft was airborne again. Checked power- fully at idle. Ok. Then yet another bounce and then nose gear fail.

I felt it was a safe landing right up to and into the flare. After nose gear fail I calmly stopped the aircraft and requested assistance from Cloquet Unicom. Assisted crew in removing from runway/taxiway and once aircraft was safely in the hanger I reported to the flying club (owner) for debrief.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Its been said subsequently that I was landing the aircraft too flat which led to a porpoise strike on the nose gear. Probably nose gear first on that bounce. I'll go with that since that guy knows and I certainly don't.

Its so unfortunate for so many reasons. I am a former military pilot getting back into the cockpit after thirteen plus years out of aviation and desire to do this right, safe, and certainly legal. I was having fun and feeling good about where I was at. Now, IDK. I cannot explain to you what happened to that aircraft after-flare/on-rollout nor can I explain what action I needed to execute to prevent. I have been told a quick go-around could have saved my butt on the first bounce. But then I read about a doctor in New York who crashed and burned doing just that. Regardless, it did not occur to me a procedural action in that moment.

I had good pattern discipline and I hit my airspeeds/altitudes. A good pattern = a good landing.... That's what I always thought.
