Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop Bent, Left elevator damage, Rudder damage, Vertical damage

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KGMU at 1801 hours on 6/29/19 after fueling for the ten minute flight to the Flying Few. Entered the pattern at the airstrip at the proper altitude, did my downwind, turned base and was too high, turned final and was too high and too fast. I actually told myself, out loud, that I was too high and too fast. Tried to land anyway. Touched down about midway on the runway (28) applied brakes as well as aerodynamic braking. I was unable to stop the aircraft before running off the end of the runway into a small ditch. The engine was at idle and as I entered the ditch the prop struck, immediately stopping the engine. As the plane settled into the ditch the back end of the plane struck the edge of the ditch causing damage to the elevator, rudder, and the vertical.

I was not injured, I exited the plane, pushed it to a tie down location on the airstrip and secured it.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Go around instead of trying to land after being too high and fast on a short grass runway.
