NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 8-4-19 at around 2pm I took off from vg18 Sky Bryce airport. After climbing at and above the tree line I think I experienced a strong quartering tailwind. There was no apparent wind at ground level. I was having a normal climb out and remember looking out at the top of the trees to my left when the stall horn sounded along with a strong sinking feeling to the left. I immediately nosed down as a reflex. The plane felt very sluggish and I could see that I had runway remaining but was off to the left slightly. I tried to correct to the right and get it straight. I think I bounced twice off the runway. I think I didn't cut the throttle until after the first bounce off runway surface and can only guess that I had full left rudder and brakes in as I went up on to the nose wheel and left main. I think I applied full right rudder and aileron and the plane came back on all three tires and it travel a short distance off the edge of the runway with the left main and went to the center line stopping not quite at a 45 degree angle to the runway I had not realized I had struck the runway with the wing until I stopped and saw the wingtip hanging by the wires. (it fell off as I was moving the plane off the runway) I stopped the engine and climbed out to inspect the damage.

The whole event happened very quickly and I was scared and acting from instinct from my training. I remember doing these things but cannot be 100 percent sure of the timing.
