Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left gear leg detached, left wing and left rear stabilizer impacted ground, and propeller impacted ground.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I flew the aircraft on a scenic flight with my passenger from KSUW where the aircraft is based to KTWB. We did two full stop landings on the grass runway 33 with no incident. On the third landing a deer ran across the runway immediately after touchdown and while on the ground roll. I felt it was too close to initiate a go around and attempted to quickly slow and stop the aircraft to avoid the deer. Upon slowing rapidly, the aircraft skidded to the right and quickly went into a ground loop from which I could not recover. The left gear leg detached and the left wing, rear stabilizer, and the propeller impacted the ground.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Look more closely for wildlife prior to landing.
