Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Substantial damages to the propeller, engine and aircraft.
Damage of the runway should be minor or less, scratched glass area.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I am a commercial pilot, CFI and live in Japan usually. Also a private pilot when I visit U.S.

It was a CFI Yanagida's plan to invest to own and have training on T-6 Texan N6432D. I applied to join and accepted. The plan involved three person, CFI Yanagida, Mr. Matsumoto and me. Mr. Matsumoto would be ATP in Japan, I'm not sure the status in U.S. but never CFI.

My training started just one year before. I stayed in U.S. about a week or less at once, last August, December, this February and August, it was fourth training period.

After receiving CFI Yanagida's dual instruction of T-6, I performed training flights in front seat, with so-called safety pilot Mr. Matsumoto in rear seat.

At start of my training, I insisted safety pilot not to take my control over, because I should be PIC, otherwise the responsibility could be uncertain in case of accident. But Yanagida and Matsumoto refused to accept my offer. CFI Yanagida said that he'll be responsible for everything, and requested to believe and follow him. So I followed their advise, in case safety pilot declare "I have", I'll reply "you have" and give all control to him and make no interference to the control.

The flight should be my training, but who will be PIC ? If no accident, PIC will be me. But what in case of accident ? The accident happened in such situation.

The flight started at 1200 on 10th August. I sat in front seat and performed most of training flight, with Mr. Matsumoto in rear seat as usual, being not sure which was PIC. We conducted 8 TGL(touch and go landing)'s safely. The accident happened on 9th TGL at runway26L my watch read 1254. We tried three point landing, the approach was normal. Touchdown bounded slightly, from a foot, less than 3 feet above the runway, I thought, it was not dangerous situation at the time. I intended to apply partial power not to stall, and continue landing. At the moment, Mr. Matsumoto declared "I have", soon I replied "you have" as assigned, and let the aircraft to his control in the air. Mr. Matsumoto let the throttle full power and pitched up, I thought it was rough control. Suddenly aircraft rolled to the right and the right wing dropped to touch the runway while landing gear still in the air, flew out of the runway, propeller and engine hit the ground, we trapped in sand smoke, and stopped. We survived without serious injury. No fire, lucky.

Afterward analysis; the aircraft was fell into departure stall in the right wing at go around. The right wing fell down to touch the runway, aircraft also rotated to the right, crash impact towards ahead was buffered by the rotation, left wing crashed to absorb the energy also, finally aircraft stopped almost backward. The scene was recorded by video, I gave to 2 person.

I think the accident was a result of Mr. Matsumoto's action, pitched up.

But Mr. Matsumoto and CFI Yanagida declared inevitability against my fault. They said my situation was catastrophic to recover, but I don't think. We do not agree at the point of this report. Also no insurance I did not acknowledge.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

In our case, responsibility of safety pilot have been uncertain in case of accident.

- Safety pilot did not acknowledge the responsibility of take over.

Need some indication concerning the responsibility of the safety pilot, especially in case after take the control over.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

I described as I know above.

I'm not sure if I was No.1 or No2 flight crew member, but filled crew No. 1. for myself.

Also stated above, I could be PIC but uncertain, still asking to FAA, I described myself "co-pilot", also could be "pilot".

I checked but don't keep actual maintenance records, etc.

I also checked WX conditions from ATIS initially, and from tower on sequence, but do not keep now.

So, information about the aircraft, WX, owner and Mr. Matsumoto will not be sure.

Finally, I apologize to make extra duty to whom concerned, ATC officials, San Bernardino County, FAA, NTSB, fire department, medical service and others.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE**Date of this Report**08/18/2019*mm/dd/yyyy***Name of Pilot/Operator:** Kiyoshi Okamoto**Signature:** _____
