Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft experienced "Dynamic Rollover" while stationed on a landing platform. Aircraft rolled off to the right side resulting in complete destruction of the aircraft. No other aircraft or property was damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On August 27th 2019, I was Pilot in Command of News Chopper 8 N218GH. At approximately 1325 hours, I took off from the mobile platform, located at Circle Air, Gillespie Field El Cajon. We had been requested to respond to a news call to cover a fire in National City Ca. After arriving on scene and working the call for approximately 30 minutes, my reporter, Jo Eager and I were cleared from the call and returned to base.

My arrival to Gillespie Field was from the south. Gillespie Tower instructed me to cross mid-field at 900' or above and make a right descending 270 degree turn over SR67 to Taxiway C. This was the normal arrival pattern with west or southwest prevailing winds. At approximately 1405 hours, I made a normal approach from east to west descending to the platform. I slid the aircraft slightly to the right as I allowed the aircraft to slowly descend over the platform. Approximately 2 feet off the platform, the aircraft drifted to the left as it touched down. Once I completely lowered the collective, I was not satisfied with how far I allowed the aircraft to drift to the left side of the pad. I decided I wanted to reposition the aircraft more to the center. I advised Jo, my reporter over the intercom that I was going to pick the aircraft up and reposition it on the pad.

I began to raise the collective to bring the aircraft to a slight hover. As I continued to raise the collective, the aircraft felt as if the nose was turning or yawing to the right. Something did not seem right and this was unusual. To correct what I perceived was right yaw I applied more left pedal but the aircraft continued in it's movement. Suddenly the aircraft rolled to the right, off the platform and impacting the concrete surface.

After impact I found myself in contact with the right side door at the bottom of the aircraft feeling almost upsidedown. I could hear the engine still making noise so I shut off the battery and fuel supply switch and pulled numerous circuit breakers hoping to prevent any fire. Circle Air employees rushed to the aircraft and assisted Jo and myself out and away from the wreckage. The wreckage was contained to a small area and no other persons, aircraft or property was damaged.

After departing the aircraft and making sure Jo was not injured, I made the appropriate notifications.
